

TTDPatch - Bug #112

Variable 9F 'Locale-dependent settings' no longer recognised ...

19/11/2006 11:22 PM - Oz Trans

Status:	Rejected	Start date:	19/11/2006
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Minor	Estimated time:	0.00 hour
Target version:			
Description			
TTDPatch Version: 2.5 beta 9 WIN Patch Feature: Title Screen			
Setting of variable 9F is no longer recognised; in title screen the settings for currency, language and measurement system not set to values in variable 9F. Still works with 2.5 beta 2, but no longer with beta 9.			
//			
Use Norwegian Trainset v0.4b, together with LangNor.grf to test			
//			
newgrf/langnor.grf			
newgrf/nsbsetw.grf 0 0 230			
//			
'morecurrencies on' required in ttdpatch.cfg			
//			
You should get, currency = 'Norwegian Krone', language = 'Norwegian' and measurement system = 'kilometers'.

Title: Bug in the GRF

This seems to be a bug in the GRF. Variable 9F is read after activation; whatever happens to it during initialization is reset. Your GRF skips writing to var. 9F during activation if the current climate isn't temperate or arctic. Since the title screen is tropic, you fail to modify var. 9F at all. Bringing the var. 9F part before the climate check should solve the problem.

I'm adding a note to the wiki to clarify this.
