Target version:	
Description TTDPatch Version: 2.6 r1449 Patch Feature: abandonedroads When loading the attached save (AbandRoad Crash), TTDPatch will crash in early July. The crash is at patches/abanroad.asm:430. edi does not point to a vehicle. r1448 does not crash, so something done in r1449 has to be causing this. I seem to have blown away my ability to create crashlogs, so I'm attaching an olly screenie instead.
