

TTDPatch - Bug #179

Orders window bug with advorders

04/01/2008 02:01 AM - Dale McCoy

Status:	New	Start date:	04/01/2008
Priority:	Normal	Due date:	
Assignee:	Jonathan Rennison	% Done:	0%
Category:	Minor	Estimated time:	0.00 hour
Target version:	TTDPatch 2.6		
Description			
TTDPatch Version: 2.6 a0 r1803 Patch Feature: adv orders			
If you add an advanced order and then click on the "Go To" button twice, the cursor stays in its "issue order" form, and it becomes impossible to click (but still possible to ctrl-click) the "Go To" button. Hitting escape, adding a conventional order (not an advanced order), or closing the orders window will cause the normal behaviour to return.
