

TTDPatch - Bug #183

Trains in PBS blocks reserve path to an opposite one way signal

20/08/2008 08:53 AM - Anonymous

Description			
Original Author: Greno Zee TTDPatch Version: TTDPatch 2.6 Alpha 0 R1985 Patch Feature: PBS			
<p>On some occasions, PBS blocks containing through-signals cause trains to reserve a path that leads to an opposite one way signal. This seems to effect only some trains - the effected ones consistently keep reserving the wrong way while others do in the same block fine.</p> <p>I also tried to revert the signal directions (the setup is a single line to double line transition) and then the problematic trains got it right and those that were ok before started reserving the wrong way (the same way as before, that is)</p> <p>Additional discussion and all files can be found here: http://www.tt-forums.net/viewtopic.php?f=24&t=38345</p>
