Description

TTDPatch Version: 2.5 beta 4

Varactions depending on variable 7F are behaving as if they cannot access variable 7F in the purchase list.

In the attached GRF, the Concorde has the following code:

```
90 * 4 01 03 08 08
```

```
//...
```

```
155 * 9 02 03 00 01 01 00 00 00 00
```

```
156 * 9 02 03 01 01 01 01 00 01 00
```

```
157 * 26 02 03 10 81 E2 00 FF 04 00 00 00 07 00 00 09 09 00 00 0B 0B 00 00 10 14 01 00
```

```
//...
```

```
178 * 4 01 03 03 01
```

```
//...
```

```
182 * 9 02 03 7C 01 01 00 00 00 00
```

```
183 * 9 02 03 7D 01 01 01 00 01 00
```

```
184 * 9 02 03 7E 01 01 02 00 02 00
```

```
185 * 18 02 03 11 82 01 00 FF 02 7C 00 00 40 7D 00 41 4C 7E 00
```

```
186 * 15 02 03 11 81 7F 00 02 03 01 10 00 02 02 11 00
```

```
188 * 10 03 03 01 03 01 FF 11 00 05 00
```

With no parameter in newgrfw.cfg, in the year 1990, that should display sprite 180, but instead the chain ends by displaying sprite 97.
