Description

TTDPatch Version: 2.6 r733

Various weirdnesses happening with the road vehicle list:

1) it seems to miscount for the scroll bar - you cannot scroll down to the last (2?) rvs in the list.

2) funny things can happen when you click vehicles:
2b) it may open the window for the wrong vehicle (the vehicle 1, 2 or 3 down from the one you clicked), or no window at all for the last few vehicles in the list
2c) it may crash TTDP with "Game Initialisation Error. Unkown Error ? $". No crashlog.
