Target version:	TTDPatch 2.5		

Description

Original Author: mvek@atlas.cz

TTDPatch Version: 2.5 beta 7 (win)

Patch Feature: trams

I have savegame, where town or I build road bridge, but it is for trams as well (bridge and one head).

The head, where tram trail is on the bridge is touching railway track (maybe with rail/road crossing) and it touches in corner railway station. I can provide savegame by e-mail.
